

LIFE SAFETY SYSTEMS FOR SHOPPING CENTER

A well known Shopping Center in Tirana, is now benefitting from an innovative range of intelligent life safety systems from Hochiki Europe, designed and implemented from CSP Company. Casa Italia Shopping Center, is one of the largest mall in city of Tirana and was opened to the public in May 2006 which currently contains shops, restaurants, cafes and other activities.

As a large retail space, Casa Italia Shopping Center required a complex multi-networked fire detection system which could be quickly and easily accessed from a number of locations across the premises. Due to the large number of stores and thousands of daily visitors, it was also vitally important for the system to be addressable so that the exact whereabouts of an incident would be known as soon as possible.

CSP contractor, were brought in to specify the most effective solutions for the project. CSP chose to install an intelligent fire alarm range produced by leading life safety system manufacturer, Hochiki Europe.

Value Delivered:

One of the requirements for this project was to protect each individual store without the alarm sounding across the whole buildings – this is a key factor of our Intelligent Kentec system as site managers can clearly identify and locate where the alarm is going off through our main control panel, thus providing a reliable, cost-effective and adaptable solution.

LIFE SAFETY SYSTEMS FOR SHOPPING CENTER

The mall, spread over 5 levels and two buildings is dedicated to shopping and entertainment offering more than 70 stores with major brands covering every need; Shops,, Supermarkets, Warehouses, Eateries and more than 300 parking spaces. Its stunning architectural design create the ideal location for relaxed shopping and entertainment, harmonized with the urban environment.

As a magnet to thousands of visitors, this retail complex demands risk management systems of the highest integrity, including life safety systems, installed, commissioned and supported by CSP.

At the heart of the fire safety system the Taktis 2-8 Loop Addressable and Touch Screen Panel, supported by Hochiki Protocol and integrated to Hochiki detection devices, plus ACD addressable CO detectors within the parking area.

This installation in such a major state-of-the-art complex emphasizes the benefits of Kentec's high integrity open protocol systems, which ensure optimum detection whilst minimizing the potential for unwanted alarms.

CSP- Your Ideal Life Safety Partner!

CSP has over 15 years of experience in designing Life Safety Systems.

Our extensive knowledge including hardware and software management solutions, combined with our long-lasting relationships with the top suppliers on the market, makes us an ideal partner when choosing your new Life Safety System – or updating your existing one.
